

Local Anesthesia From Head to Toe

PROGRAM DETAILS – Day 1, Saturday November 9th, 2019
Algonquin College, Ottawa

From the Neck Down

OVERVIEW

Day 1 features an interactive lecture format combined with a hands-on cadaver laboratory.

The lecture will address systemic and local anesthesia best practices, drugs and drug combination options, indications and contra-indications and how to incorporate local anesthesia into your current general anesthesia protocols. The laboratory session will focus on canine and feline local anesthetic techniques that you can use every day in your practice to enhance patient comfort.

DETAILS

Anesthesiologists Drs. Nancy Brock, Stefania Grasso and Kris Torske lead participants in interactive discussions and hands-on guided techniques practice.

Techniques using both canine and feline cadavers include:

- Incision and infiltration blocks (spay)
- Testicular blocks (neuter)
- Sacro coccygeal blocks
- Axillary blocks
- Intercostal blocks
- Metacarpal blocks
- Epidural blocks
- Soaker catheter placement and management
